What is this research study about?
.....

This study for HIV infected people will test the ability of an investigational therapeutic vaccine to increase a part of the immune system (CD4 cells) which may have an effect on the course of HIV infection.

RESEARCH STUDY OF AN INVESTIGATIONAL HIV THERAPEUTIC VACCINE

.....
To be eligible for this study:
.....

- You must be 18 to 55 years of age
- You must be HIV+ and have CD4 cells over 500
- You have not taken any HIV medications (antiretroviral therapy or ART) except for a short term to prevent mother-to-child transmission
- You have no plans to start HIV medications during the next year
- Your doctor will tell you what else is required to join this research study
