IRB Protocol Number: 2010H0336
IRB Approval Date: 01/25/2011

- *Are you an HIV positive male who has or has had sex with men?*
- *Have you never taken anti-HIV medications?*

If yes, you may qualify to be a participant in the Multicenter AIDS Cohort Study (MACS).

This important observational study has been ongoing since 1983 and has contributed to the understanding of the natural history of HIV and the impact of developing new anti-HIV medications. As a volunteer you'll be providing an invaluable service to HIV/AIDS research worldwide.

Participants will receive free lab tests every six months and some compensation will be provided for study participation.
